

Version 6.05.00 Upgrade

Added: When a quote or a project quote is won, there is now an option to send the labour, parts, service sections to the Costing Only or Costing and Invoicing sections of the Job

Added: An extra option allows you to calculate the equipments next service date based on the Date Job Completed.

Added: New updated version of the Template Designer which addresses the mouse scroll range check message and also has improved printing for network printer.

Added: When sending counter invoices to MYOB, comments and ship via fields are now sent to MYOB.

Change: The small print option next to the Print button on the Purchase Order screen was able to be selected before a Purchase Order had been created this print button is now disabled until a supplier has been selected.

Change: The Work In Progress screen now sorts by Job Number.

Change: The freight recorded on a counter invoice is now sent to MYOB.

Change: Template Jobs are no longer displayed on the Old Scheduler.

Fixed: If the “*Check Stock on Hand*” option was selected in JobsPlus the labour component on the invoice was creating a Run Time Error Data Conversion mismatch

Fixed: Reports Purchase Order Bills by Job and Purchase Order Bills by Job – Summary were generating an error message when trying to print.

Fixed: When invoice screen was maximised, the scroll bars did not appear and buttons were out of alignment

Fixed: The Import at Start Up option wasn't working in Single / Demo versions

Fixed: When closing JobsPlus and there are items still left to export to MYOB, the message dialog box doesn't appear to let you know. (Single / Demo version only)

Fixed: When you delete a purchase order that doesn't have the Job numbers in the column it still asks whether you want to delete them from the job as well

Fixed: The default labour task is not bringing up the cost and sell rates if you use the mouse to enter in the information.

Version 6.02.00 Upgrade

Added: Compatibility with the current and immediate previous version of MYOB

Added: Disabling Approved button on Payroll screen when the payroll has already been audited

Fixed: Timesheets not going to MYOB immediately (Single User version only)

Fixed: Searching for a Job / Quote template resulted in a runtime error

Removed: Outdated MYOB types from Register Business screen setup

Fixed: Timesheets and labour going to the wrong Job Section under the Labour Tab

Added: Job Type and Job Status search filter to the Work In Progress screen

Added: Job Type and Job Status search filter to the Work In Progress Reports

Fixed: Equipment column headers were out of alignment when creating new Job / Quote and searching for the piece of equipment.

Fixed: When maximising the following screens they were aligned to the top left instead of centred

- Project Job
- Project Quote
- Timesheet
- Payroll

Added: The ability to use Job / Quote templates when creating a Project

Fixed: When using the Work Times screen on Jobs to calculate hours worked, the wrong labour line was being updated

Fixed: Selecting the Date from the calendar in Check Lists and Extra details were not being saved.

Added: The ability to select costing only lines when creating an Invoice

Fixed: If selecting a Job in Job Labour Clock section and the Job Title was blank, it created a runtime error 94 invalid use of null

Added: Alternative part description has been added to the template fields, these are only available for printing on templates and not screen displays.

Fixed: When clicking on the Re-calculate button and recalculating and option while the Labour tab was highlighted caused a runtime error
